📁 GitHub: github.com/fat7i-althareeb 📍 Aleppo, Syria 🔗 fat7i.dev 📧 @Fat7i_Alghareeb

Flutter Developer with 3+ years of experience building high-performance cross-platform mobile applications and Flutter Windows desktop apps. Experienced in Clean Architecture, real-time communication, CI/CD, Firebase, and ASP.NET Core integration for scalable end-to-end systems. Improved application performance by up to 90% and reduced bugs/crash rates by up to 30% through refactoring, optimization, and production maintenance.

Professional Experience

HOMSI 📍, *Full-Stack Developer (Contract)* 04/2026 – Present | Aleppo

- Built an end-to-end taxi platform for the Netherlands, including mobile apps and ASP.NET Core backend.
- **Served** as a **full-stack developer** working with both the Flutter framework and ASP.NET Core backend.
- **Developed** scalable RESTful APIs that enable real-time synchronization.

Evolvo 📍, *Flutter Developer (Part-time)* 02/2026 – Present | Aleppo

- **Designed** a service booking platform containing two mobile apps and a web-based management dashboard.
- **Built** a robust Windows desktop application using **Flutter Desktop** to manage operations seamlessly.
- **Refactored** the mobile codebase using Clean Architecture.

Al-Sultan Jewelry 📍, *Flutter Developer (Part-time)* 01/2026 – Present | Remote

- **Designed** and implemented **two** enterprise-level management systems aimed at jewelry businesses.
- **Re-architected** a legacy application from scratch, resolving structural issues and boosting overall responsiveness and performance by over **90%**.
- **Implemented** a native client-side **PDF** generation and invoicing module directly within the Flutter app.

Elkood Company 📍, *Flutter Developer (Full-time)* 10/2024 – 01/2026 | Aleppo

- **Successfully** developed and released **5 production applications** on Google Play and App Store
- **Shipped 12+ features** and integrated Google Maps and in-app purchases for **2,000+** active users.
- **Increased** application reliability by **25%** and decreased crash rate up to **30%**.
- **Collaborated** within Agile/Scrum cross-functional teams.

Freelance, *Flutter Developer* 01/2023 – Present | Remote

- **Contributed** to features and modules in large Flutter projects and delivered smaller apps on my own.

Technical Skills

Mobile Development

Flutter (Advanced): Clean Architecture, MVVM, Feature-Based Modular Design, BLoC/Cubit, Provider, GetX, Go Router, Deep Linking, Dio, Retrofit, JWT, Secure Storage, Firebase, SignalR, Google Maps, In-App Purchases, Local Notifications, Background Services, ObjectBox, Hive, SQLite, Shared Preferences, Responsive UI, Animations, Flutter DevTools, App Store and Google Play deployment.

Android Native (Foundational & Growing): XML Layouts, Jetpack Compose, MVVM, Retrofit.

Backend Development (Supporting Skillset)

ASP.NET Core, EF Core, REST APIs, PostgreSQL, SQL, JWT, Role-Based Access Control, Swagger.

Programming Languages

Dart (Advanced), C# (Intermediate), Kotlin (Intermediate), Java (Intermediate)

Tools, DevOps & Practices

Git, GitHub, GitLab, Docker, Mason, Codemagic, CI/CD, Xcode, Continuous Integration, SOLID Principles, Dependency Injection, Design Patterns, Unit Testing, Crash Analytics.

Soft Skills

Collaboration · Communication · Organization · Flexibility

Projects

Be-the-Best, (Elkood)

- Built an e-learning platform with real-time chat, encrypted document storage, and interactive flashcards.
- Used **SignalR** for instant messaging and added support for multiple languages.
- Optimized performance for large user bases, reducing load times by ~20% and maintaining 96% crash-free sessions.
- Deployed subscription flows with in-app purchases.
- [[Google Play Link](#)] | [[App Store Link](#)]

Q2AUTO, Digital Security Guard Management System (Elkood)

- Independently developed the mobile application, which includes secure multi-role authentication and RBAC.
- Created features for managing quotes, including automatic cost calculation and PDF generation, along with automatic commission calculation.
- [[Google Play Link](#)] | [[App Store Link](#)]

Royal Button, (Elkood)

- Delivered a POS administration app with guided onboarding, **deep linking**, and **image-based product search using Google ML Kit Object Detection**.
- Enhanced usability and performance, achieving 95% crash-free stability.
- [[Google Play Link](#)] | [[App Store Link](#)]

G-Store Driver, (Elkood)

- Developed an app that includes **Google Maps**, clustering, **background tracking**, and **SignalR live updates**.
- Reduced unnecessary API calls by about 30% and reached 95 to 98% crash-free sessions with improved background services.

UniSphere, University Management System (Full-Stack Graduation Project)

- Designed a full-stack university management system with **two Flutter apps** and an **ASP.NET Core backend**.
- **GitHub: Admin App** | **Student App** | **BackEnd**

Project Contributions & Maintenance

- Maintained production apps, bug fixes, and enhancements that reduced crash rates by up to 30%.
- (**I'm Here** – [Google Play](#) | [App Store](#)) | (**Pytha-Course** – [Google Play](#) | [App Store](#)) (**أنا** – [Google Play](#) | [App Store](#)) | and some other company projects

Education

B.Sc. in Computer Engineering | FEEE, University of Aleppo

Courses

Mastering ASP.NET Core, metigator

08/2025 – 05/2026

Google IT Support, (Coursera)

03/2023 – 07/2023

Languages

Arabic

Native

English

Professional working proficiency
